# Perfectionism Is Increasing

New study shows perfectionism is rising and peaking in millennials.

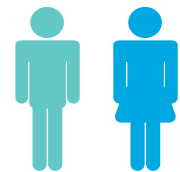

## 3 Major Findings

Perfectionism has increased over the past

**25 years.**

Perfectionists become more **neurotic** and less **conscientious** as time passes.

**Men** and **women** report similar levels of perfectionism.

**"It's important to note that high standards are not the same as perfectionistic standards, and that striving for excellence and striving for perfection are not the same thing."**

**- Dr. Martin Smith**

Our study is one of the largest ever studies on perfectionism.
