Welcome Address

Prof. Yu-Kai Chang

**World Congress President and President of
Society for Sport and Exercise Psychology of Taiwan**

Dear ISSP President, Professor Robert Schinke, ISSP Managing Council members, Local Organizing Committee members, Keynote speakers, Distinguished Guests, Ladies and Gentlemen,

On behalf of the Society for Sport and Exercise Psychology of Taiwan (SSEPT), the Local Organizing Committee and our highly committed organizing team, I am very pleased to honor your dedicated participation in the ISSP 15th World Congress, hosted here in Taipei, and I heartily welcome all of you to this stellar event.

The ISSP World Congress is one of the most important academic events associated with sport and exercise psychology worldwide, a premier gathering which also leads the field in promoting the latest academic trends in this discipline. The central ISSP Congress theme this year is: "The Future of Sport and Exercise Psychology: New Horizons beyond the Olympic and Paralympic Games in the Pandemic World".

We have dedicated our professional efforts to preparing for this Congress, ever since we first bid for the honor of hosting the event, in 2017. Although we are currently encountering the most unfortunate pandemic situation, we have never wavered in our preparatory and organizing efforts. Even though our Congress this year will be an online event, it will nonetheless be made replete with many fine contributions of outstanding academic papers. With your excellent support, the event has received more than 620 submissions and registration from 57 countries..

ISSP is an international organization that can quickly adapt to the changes of the world. Under the epidemic conditions, we are applying a whole new online approach for both participation and presentations, as well as for the opening and closing ceremonies, and the general assemblies. In addition, in order to better promote our branch of knowledge to the world, our presentation videos, filmed during the congress, will not only be released to the members of the association for one month, but will also be released openly to the world, again for an additional month. This approach confirms our organization's dedicated effort and the ISSP's responsibility toward promoting the field of sport and exercise psychology worldwide.

I deeply and truly appreciate all the outstanding collaborations with the ISSP in organizing and sponsoring this event, especially the generously provided support given by the city of Taipei Government, the Sport Administration of the Ministry of Education, the Ministry of Science and Technology, the Ministry of Foreign Affairs, the Bureau of Foreign Trade, Ministry of Economic Affairs, and National Taiwan Normal University. I also wish to thank our partnership associations for showing their invaluable affirmation and sincere friendship.

We hope that many sport and exercise psychologists, sport and exercise scientists, and all who are interested in sport and exercise psychology, will greatly and sincerely enjoy this prestigious event, and all of its inviting features that we have prepared for you. We have made every effort in view of fostering more inclusive professional development and cultural exchange within this burgeoning academic field. While we are not all able to experience the beautiful and loveable city of Taipei on location, I believe that this event will be your first wonderful impression of our friendly and welcoming city, and we are eagerly looking forward to seeing you all in person, as soon as conditions will allow.

Prof. Robert Schinke

ISSP President

Dear Congress Participants,

I welcome you to the 2021 ISSP World Congress, being held virtually in Taipei. The ISSP World Congress has always been a historic event, and this congress is of no exception; it has uniqueness, though in a most different way than any previous ISSP Congress event. Amid Covid and the fatigue we have all encountered as professionals and in our personal lives, there is no more important time than the present to unite and exchange ideas focused on human potential through sport and physical activity. We reside within the world of movement, as avid participants and simultaneously, as supporters of clients and participants, with their own unique motives, leading to engagement.

The 2021 ISSP World Congress will be an open exchange of ideas through virtual means. Ideas, catalyzed through challenges, leading to scientific and practical resolutions, will be brought forth from you, the internationally composed congress participants. The topics will span diversity of nationality, race, ethnicity, gender identity, sexual orientation, among a breadth of intersecting aspects of human identity and their reciprocal relationship within our field. The keynote addresses and award recipients will reinforce the inevitable diversity of intellectual exchanges typical in an ISSP World Congress.

Also considered within this congress, among the vast diversity of subject matter in exercise and sport, is the recent Tokyo Olympic and Paralympic Games, completed during a pandemic. There are few more evocative contexts through which to consider human resolve among athletes, coaches, and organizations. Time will tell the full scale of science and practice resulting from the recent Tokyo Olympics. However, the breadth of presentations relating to the recent Olympic context will span high-performance sport, youth sport, and translate to human resolve in physical activity contexts.

I wish you every enjoyment and learning opportunity gained through this event, where presentations will span the continents of Africa, South America, Asia, Europe, North America, and the Oceanic region. While engaging in the congress, please do remember there will be a General Assembly scheduled at a globally accessible time, where you will most certainly gain insight into the current and future activities of the ISSP. You belong within the ISSP, and there will certainly be many places for you within our evolving organizational structure. Welcome to the Congress!

Warmest wishes,

Prof. Wen-Je Ko

Mayor of Taipei City Government

ISSP President Professor Robert Schinke, World Congress President and Professor Yu-Kai Chang, Distinguished Guests, Ladies, and Gentlemen,

With great pleasure, I extend, on behalf of Taipei City, our warmest welcome to the delegates of the International Society of Sport Psychology, 15th World Congress in Taipei.

As the mayor of Taipei City, I am honored by your selection of Taipei as the venue for this congress. The world is facing grave challenges this year because of the COVID-19 pandemic, and we are all aware of the sobering fact that the community infections here have not yet ceased. As a result, the ISSP organizing committee has made the difficult decision to hold the World Congress as an online conference instead of a live event. However, with their hard work and our full support, we are assured that the 15th World Congress will be successful. I am sure that you will be amazed by our people's kindness, and I sincerely hope that our foreign delegates will visit Taipei again once the pandemic has receded.

I believe that this World Congress will provide the attending sport psychologists and other experts an excellent platform for sharing techniques and management experiences relating to sport and exercise psychology. We sincerely hope that, with our combined efforts, the event will inspire greater interest in this discipline, foster more groundbreaking research, and further contributions to applied methods for improving the performance of athletes, scholars, and coaches.

In closing, I wish the ISSP 15th World Congress great success. Thank you very much.

ISSP president Professor Robert Schinke, World Congress President and Professor Yu-Kai Chang, Distinguished Guests, Ladies and Gentlemen,

On behalf of the Ministry of Science and Technology, I'm greatly honored to join the International Society of Sport Psychology (ISSP) 15th World Congress, that is being hosted by the Society for Sport and Exercise Psychology of Taiwan. In the Ministry of Science and Technology (MOST, for short), one of our main jobs is to provide funding resources to the universities and academic institutes. There are 25 disciplines in the Department of Humanities and Social Sciences. Every year, we support numerous projects in the field of Exercise and Sport Science. Considering the importance of this discipline for the training and development of athletes, professors and coaches, MOST will continue to make strong efforts in assisting academic research and technical development in the field of Exercise and Sport Psychology.

I understand that the Congress of ISSP is a well-known global platform enabling sports scientists to exchange their scientific information, academic and research results. This year, the ISSP 15th World Congress is being held in Taipei, and MOST sincerely welcomes all the distinguished guests from the 52 participating countries. I believe all the participants will receive excellent firsthand knowledge and cutting-edge information at the Congress.

Finally, I wish you a very successful Congress, and wish you all good health and more power in advancing your pursuits of excellence in this discipline.

President of National Taiwan Normal University

ISSP president Professor Robert Schinke, World Congress President and Professor Yu-Kai Chang, Distinguished Guests, Ladies and Gentlemen,

It is my pleasure to take part in the opening ceremony for the International Society of Sport Psychology (ISSP) 15th World Congress. On behalf of the National Taiwan Normal University (NTNU), I would like to extend a sincere welcome to all participants who have joined at ISSP 2021 in Taipei.

I am delighted to see so many leading experts from various countries attending this special event. I would also like to especially acknowledge Congress President Prof. Yu-Kai Chang (the President of the Society for Sport and Exercise Psychology of Taiwan, and Research Chair professor at NTNU), and his colleagues, for organizing and hosting this prestigious event. All of them have worked very hard over the past few years in order to bring this congress to Taipei, thereby giving us this important opportunity for sharing our professional experiences and fostering greater international exchanges concerning this discipline.

Once again, let me extend my warmest welcome to all of you. I trust this will be a valuable platform for exchanging information and ideas, and that all participants will benefit greatly from the event's discussions. Let me close by wishing you all good health, much happiness, and a very successful ISSP 15th World Congress.

Information for Presenters

Every ISSP Congress lives off the wide array of excellent scientific presentations and discussion/presentations on best practice interventions. The Parallel Sessions are at the heart of this Congress, where researchers and practitioners from all over the world will showcase their recent studies and results, or their best practice scenarios, in oral presentations. Every morning from 9:00am to 10:15am, and every early afternoon, from 1:00pm until 2:45pm, there will be 9 parallel sessions on a variety of topics. During those sessions, we invite you to attend engaging demonstrations and discussions of state-of-the-art research and applied interventions in all fields of sport and exercise psychology.

Special Session

Partnership Symposium

The partnership symposium is invited symposium and is a 75-minute session, presenting 4 to 5 abstracts on a single theme, treated from different perspectives on a sub-theme relating to Sport and Exercise Psychology, and Motor Learning and Control. The focus of the presentations can be theoretical, methodological, or applied. Symposia organizers are responsible for time management during the sessions and should allow sufficient time for questions, and discussion with the audience.

ISSP aims to connect associations from all over the world. The organizing committee presents invited partnership symposia from the following organizations:

- Australian Psychological Society (APS)
- American Psychological Association Division 47 (APA Division 47)
- Asian-South Pacific Association of Sport Psychology (ASPASP)
- Association for Applied Sport Psychology (AASP)
- Canadian Society for Psychomotor Learning and Sport Psychology (SCAPPS)
- European Federation of Sport Psychology (FEPSAC)
- Japanese Society of Sport Psychology (JSSP)
- Society of Sport and Exercise Psychology of Taiwan (SSEPT)
- The Mental Health and Physical Activity Research Centre (MPARC)
- Russian Association of Sport Psychologists (ASP)

Keynotes

During this year's Congress, there will be a total of seven Keynotes. Each keynote speaker is an international, highly renowned scientist, all from different fields of sport and exercise psychology. They will hold presentations of 50 minutes, followed by 10 minutes of discussion, which are open to questions from the audience. Each entire keynote will be moderated by a moderator.

ISSP Distinguished International Sport Psychology Award & ISSP Honor Award

- **The Distinguished International Sport Psychology Award**
The ISSP Distinguished International Sport Psychologist Award is the highest award given by the ISSP. This award is given in recognition of outstanding and distinguished, long term, original contributions to the advancement of sport psychology.
- **The ISSP Honor Award**
The ISSP Honor Award is presented in recognition of significant contribution to national and international sport psychology through leadership, research, and/or other professional service.
- **The ISSP Developing Scholar Award**
The ISSP Developing Scholar Award is presented to developing sport psychologists in acknowledgement of their contributions to excellence in research and scholarly activity.

· **The ISSP Developing Practitioner Award**

The ISSP Developing Practitioner Award is presented to early career sport and exercise psychology practitioners in acknowledgement of their contributions to excellence in the applied work and promotion of sport and/or exercise psychology.

Pre-Congress Glencross Workshop

The Glencross Workshop is a special Pre-Congress workshop, in which the ISSP Managing Council members and invited experts make unremunerated (voluntary) presentations to students interested in Sport and Exercise Psychology, in order to stimulate the development of this discipline around the world. The Glencross Workshop is an ISSP traditional event that promotes its major mission, which is to facilitate development of high-quality research and practice in sport and exercise psychology, and to share relevant knowledge and expertise internationally.

The Glencross Workshop was inaugurated in 1997, in association with the ISSP 9th World Congress of Sport Psychology, and in memory of Dr. Denis Glencross, the Australian sport psychologist who was elected President of the ISSP in 1993, after his many years of service to the Society. Sadly, Denis passed away little more than a year into his 4-year term of office. One of his first initiatives as a President was an idea of a Pre-Congress Workshop for students. The Glencross Workshop was established in recognition of the sterling service that Dr. Glencross gave to the ISSP.

General Session

General Symposium

The general symposium is a 75-minute session, presenting 4 to 5 abstracts on a single theme, treated from different perspectives on a sub-theme relating to Sport and Exercise Psychology, and Motor Learning and Control. The focus of the presentations can be theoretical, methodological, or applied. Symposia organizers are responsible for time management during the sessions and should allow sufficient time for questions, and discussion with the audience.

Oral Presentations

Oral presentations consist of up to five oral presentations. Each individual presentation is allotted 12 minutes for presentation and 3 minutes for questions. The sessions have been compiled based on single contributions that are related to Sport and Exercise Psychology, and Motor Learning and Control. All oral presentations are scheduled for 75 minutes. Session moderators are responsible for time management during the sessions, in order to allow switching between sessions, and should allow sufficient time for questions and discussion with the audience.

Give me Five-5 Slides in 5 Minutes Free Communication Presentations

In these sessions, each presenter will have five minutes to present a maximum of five slides followed by 2 minutes of questions in a chaired session of short communications. A maximum of ten contributions are presented within one session. Session moderators are expected to take charge of time management during the sessions in order to allow switching between sessions.

Poster Presentations

Poster presentation is a way for scholars to communicate their research or their understanding of a topic in a short and concise format. All posters are displayed on the ISSP 2021 Virtual Platform. Each poster has a dedicated page that includes a poster PDF, or a 3 minutes poster presentation. Once on the page, viewers will notice the embedded "chat" and "Q&A" window on the right, next to your video file. This feature permits attendees to ask questions, and presenters can then respond promptly. Presenters may also add a welcome message, so as to encourage attendees to engage with you on this feature.
